## Project

- Quiz Game (Using Python): Created a quiz game that uses simple if-else and if-elif conditions. Demonstrated understanding of Python programming concepts.
- Virtual Assistant (Using HTML, CSS, JS): Developed a virtual assistant that responds to voice commands. Utilized speech recognition and synthesis API.
- Text-to-Image Converter (Using HTML, CSS, JS): Developed a text-to-image converter that generates images based on user input. Utilized HTML, CSS, and JavaScript to create a user-friendly interface.
- Landing Page (Using HTML and CSS)
- Stop Watch (Using HTML, CSS, and JavaScript): HTML is used to structure the elements of the application. By implementing functions for starting, pausing, and resetting the stopwatch, as well as tracking and displaying lap times, users can accurately measure and record time intervals. With these technologies and functionalities, you can create an interactive and user-friendly stopwatch.
- Tic-Tac-Toe (Using HTML, CSS, and JavaScript): By implementing functions to handle user clicks, track game state, and check for winning conditions, you can create an interactive and engaging tic-tac-toe game.
